# ТЭНСАЙ ЮНЫЙ ГЕНИЙ

AGE  
2-12

The workbook series Tensai is based on the methodology developed by the outstanding Japanese neuroscientist and neuropsychologist professor [Ryota Kawashima at Tohoku University](#). It turns out that our brain can be trained not only in adulthood in order to sustain active memory, develop its potential and prevent the onset of dementia. It is proved that regular studies with children from age 2 to 12 during the intense development of our brain, which is our most important organ, can lead to astonishing results. Tensai, which translates from Japanese as gifted, smart and genius, is a methodology that aims at integrated development of thinking, logic, memory, attention and observational skills. Simple games and fun tasks will stimulate both the right and left cerebral hemispheres, increase intellect and mental capabilities of your child.

Big Strategy by Vladimir Putin

368 pages \* ISBN: 978-5-4461-1600-3

Vladimir Putin has been criticized of having no strategy and certainly no ideology for twenty years. But is it true? No! Putin becomes more and more illegible over the years, but he has a strategy and not a simple one, but very sophisticated. And of course his strategy is historically conditioned, turned to the future, and which itself is a strategic weapon in the global confrontation. The author of this book attempted to characterize Putin in the most intimate way - in a big strategy. He tries to understand the ideology from Putin's statements and his political gestures, from his words and steps, because in modern times there is no place for a straightforward ideology. Nevertheless, it seems that the author managed to give an answer to those who claim that our society has no ideology at all. Read this book and you will understand that it's not true!

369 pages \* ISBN: 978-5-4461-0511-3

Six years have passed since the first edition of this book was published. But the topic, described in the first edition, unfortunately, became even more topical. Chaos spreads throughout the Middle East, war in Syria, war in Ukraine, millions of refugees have flooded Europe. A lot of things happened within this 6 years, but only one thing remains unchanged: the essence of the events that are taking place. Chaos and revolution are not just satellites of the struggle of the dollar, USA and the Western world for hegemony in the world: they are the tools of this struggle now. The main target for the attacks today is Russia. And this is because we have a weak place. This place is the Russian elite, or rather, the pseudo-elite, which is too closely tied to the West and is oriented toward it. All the defeats of the twentieth century were connected with this. Therefore, the time has come for the emergence of new names, parties, ideas. The stage of simple preservation of Russia has come to an end. There has come a stage of forward movement, and restoration of power.
